D.O. No. 21.29/M 19 APR 1945 GOVT. OF MYSORE

To

The Secretary to the Government
of His Highness the Maharaja of Mysore,
Railway Department, Bangalore. 72/9

Sir,

1945 forward programme of Points & Crossings.

OPEN

Further to my letter No.G.745 dated 14-3-45 on the subject, I have the honour to forward herewith for information of Government a copy of Chief Auditor's letter No.SFL.9/2328 dated 3/4/45 and my reply No. G.18229 dated 17.4.45

As I very much doubt whether Government of India would agree to take the manufacturing cost after making supply, I have again requested the Chief Auditor to arrange for the deposit immediately as the Chief Controller of Purchase (Munition) wants expeditious action being taken. As already required in my letter referred to above, approval of Government may kindly be obtained and communicated for the advance deposit which the Chief Auditor has been

P.T.O.

requested to arrange.

The general question of deposits in advance has to be taken up separately.

I have the honour to be,
Sir,
Your most obedient servant,

General Manager.

MJM/16-4.

NP
17/4.

Copy of letter No.Sfl.9/2328 dated 3-4-1945 from the Chief Auditor, Mysore State Railway, Mysore, to the General Manager, Mysore State Railway, Mysore.

Your No.G.16384-86 dated 14-3-45. 1945 forward Programme of points and crossings.

With reference to your above letter requesting me to deposit Rs.43,496-14-0 being the manufacturing costs, I beg to state that hitherto deposits were arranged only for supply of stores and this is the first time you are asking us to deposit to cover manufacturing expenses.

No reference has been made in your above letter addressed to the Secretary to Government, Bangalore regarding the above point.

Whether Deposits are necessary even for manufacturing expenses is not clear.

As such, kindly let me know as to why we have to make advance deposits even before manufacturing the articles to be supplied.

MJM/17-4.

No. /FL.

To

The Chief Auditor,
Mysore State Railway,
Mysore.

Dear Sir,

Sub:-1945 forward programme of points & Crossings.
Your letter No.SFL.9/2328 dated 3/4/45.

In para 3 of your above letter you have raised a point whether deposits are necessary even for manufacturing expenses. I am of opinion, that, so long as the Government of India do not agree to waive the question of advance deposit for stores supplied to us, they may not agree also to take the manufacturing expenses after supply is made. for, in essentials both mean the same. Moreover, no useful purpose is likely to be served by writing to Chief Controller of Purchase (Munition) as he has specifically asked us to deposit the manufacturing expenses. So, the required deposit may kindly be arranged immediately pending approval of Government.

I am sending a copy of this letter and also yours to Railway Secretary for information of Government.

Yours faithfully,

Sd/-
General Manager.

GENERAL MANAGER'S OFFICE,

Mysore 15 Dec 1945

No. 513 /Fl.

KW 12/12 146/42 Encls. 2

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Railway Department, Bangalore.

Sir,

Manufacture of Points and crossings required during 1945.

With reference to your letter No.R.S.2500 dated 19-4-45, I enclose herewith a copy of letter No.MP/131211/C-31 dated 22/5/45 from the Chief Controller of Purchase(M) Calcutta to our Controller of Stores furnishing details for Rs.43,4,96-14-0 deposited as sanction in G.O. No.R.S. 2497-99 dated 19-4-45, along with the schedule to the acceptance of tender.

As regards the other point in your letter under reference, viz. whether it is not possible to manufacture such points and crossings here alone, I am to state that this work can be undertaken in our shops, but the cost of manufacture will be rather high. As per details furnished by Loco & Carr.Superintendent, it will be approximately Rs.1,067/- per set. This work cannot also be done without prejudice to more important works connected with Engines and waggons. We have no Engineering workshops where such works could be done. It is proposed to have such a shop and I have requested Loco & Carr. Superintendent and Chief Engineer, to work out the details in this

P.T.O.

connection.

This is also included as an item in the post-war list of works

I have the honour to be,
Sir,
Your most obedient servant,

General Manager.

MBT.

Copy of letter No.IP/151211/C-31 dated 22nd May 1945 from the Chief Controller of Purchase (Munitions) Calcutta, to the Controller of Stores, Mysore State Railway, Mysore.

Subject: Points & Crossings required against your indent No.PSC-249 dated 16-9-1944.

Ref: Your letter No.PSC 16259 of 5-5-1945.

The details of the manufacturing costs for the stores required against the above indent are as under:-

Item	Unit	Quantity	Rate per unit	Total cost
1	Set	8 Sets	Rs.372/-	Rs. 2976/-
2	"	8 Sets	Rs.460/-	Rs. 3680/-
3	"	8 Sets	Rs.369/-	Rs. 2952/-
4	"	8 Sets	Rs.457/-	Rs. 3656/-
5	"	10 Sets	Rs.330/-	Rs. 3300/-
6	"	10 Sets	Rs.415/-	Rs. 4150/-
7	"	30 Sets	Rs.321/-	Rs. 9630/-
8	"	30 Sets	Rs.410/-	Rs.12300/-
		112		
			Total	Rs.42644/-

The Total value of the demand comes to Rs. forty two thousand, six hundred and forty four only excluding the 2% experimental charges.

GOVERNMENT OF INDIA

R A I L W A Y D E P A R T M E N T.

(Railway Board)

No. 1690-W.

Dated Simla, the 20th August 1937.

x

Sir,

Roadways over Railway bridges.

I am directed to bring to the notice of the Governm of Madras etc. that the Railway Board have had under considerat for some time the question of revising the rules regulatin the incidence of the cost of roadways provided over railwa bridges, which were promulgated with Government of India, Public Works Department Circular letter No.1151 R.C. of 23 September 1902.

2. As the Madras etc. Government are aware, under the rules then promulgated, the Road authority is charged the bare ex cost of providing the roadway, that is, the cost only of th extra metal required in the girders, and does not bear any of the cost involved in the provision of the piers and sub-structure of the bridge, as well as the necessary training a protection works. The Railway Board have for some consider ble time realised that this "bare extra cost" principle is inequitable to railways, and they feel that where a Provinci Government or other Road authority requires a particular faci ty, it should be incumbent on it to meet its full share of th cost.

The unfairness to railways of this "extra cost" princi has also been greatly emphasized by recent developments in regard to transport. For instance, when the existing rules for the division of the cost of rail cum road bridges were

3. Maintenance. This may be considered under two heads, viz.,

(I). The General upkeep of the bridge structure, including painting of girders, repairs to piers, protection and training works etc., which are essential borh for the railway and the road and (II) the upkeep of the road-surface as well as the annual charges for gatemen, lighting, signalling, etc., in cases where these have to be provided.

(a) In the case of new roadways, i.e., whether on new or regirdered bridges, item (I) will be carried out by the Railway Administration but the annual cost will be divided between the railway and the road in the same proportion as the division of the capital cost.

The annual charges under item (II) will, however, be borne entirely by the road authority, which may, however, if it so desired, undertake the actual work of maintenance, but on the express condition that no material change in the road surface, as for example in the quality or weight of the road metal, is made without the consent of the Railway Administrati

(b) Existing Roadways. No division of the maintenance costs shown under item (I) will be made in the case of roadways already existing and these will continue to be borne by the Railway Administration. The charges shown under item (II) above will, however, with effect from the date of these orders be borne by the road authoritty except where it can be shown that a Railway Administration had been compensated in any mann for the maintenance charges incurred by it.

The provisions in this paragraph are not intended to disturb existing agreements for the maintenance of roadways during the terms of such agreements, but when the agreements terminate in the normal course, they will not be renewed.

4. These rules will apply mutatis mutandis also where provisi is made for roadway facilities for purely military traffic ove railway bridges.

Addendum and Corrigendum Slip from the Director, Railway Board, Simla, No.13, dated the 20th August, 1937.

The addendum and Corrigendum Slip has been posted in the "Bridge Rules." This will be therefore recorded.

No:14. APPENDIX C. 18 September 1937.

Rules for Prestressing Lattice Girder Spans.

(a) Preparation of Camber Diagram.

1. Contract drawings are dimensioned for the truss without camber and in order to ensure that the fabrication and erection of main girders shall be such as to eliminate secondary stress in the loaded span, a camber diagram shall be prepared on which shall be clearly indicated the amounts by which the nominal lengths (i.e., the the lengths which will give no camber) of members shall be increased or decreased so as to give the nominal outline under full load. For the purpose of this clause, full load shall be dead load, live load (e.u.d.l., for bending covering the whole span) and impact allowance.

2. The stress camber change in each member shall be equal to t the change of length of the member due to the above loading, but of op opposite sign.

3. For the purpose of calculating the change in length of members under stress, the modulus of elasticity for both high tensile and mild steels shall be taken as 13,400 tons per sq.inch. The effective length shall be taken between the theoretical intersection points of adjacent members.

4. A further camber change equal to $\frac{\text{Bottom chord extension}}{\text{Bottom chord length.}}$ length of member (=K x l) shall be added algebraically to the stress camber change to give the full camber change.

5. The nominal truss lengths corrected for the full camber changes give a truss correctly stress cambered and with a cembered bottom chord length for "through" trusses identical with that shown on the contract drawings, thus requiring no modifications to floor and bottom lateral system lengths.

6. The nominal lengths and camber lengths shall be rounded off to the nearest 1/64".

7. The difference between nominal lengths and camber ~~length~~ lengths thus modified is the practical camber change.

8. A Williot diagram shall be drawn for the practical camber changes to obtain ordinates of the erection packings necessary to produce the require camber.

9. Adjustment of lengths shall be made to top lateral bracing members to suit camber lengths of top chords in the case of through truss spans. The average value of the prestressed lengths of the top lateral members shall be adopted throughout.

(b) Fabrication.

1. The actual manufactured lengths of the members are to be the lengths "with camber" given on the camber diagram.

2. The positions and angular setting-out lines of all connection holes in the main gussets and also the positions of the connection holes in the chord joints and the machining of the ends shall be exactly as shown on the contract drawings. This will permit the butts in the chord segments to be exactly as shown on the contract drawings.

3.The groups of connection holes at the ends of all the members are to be as shown on the contract drawings, i.e., without any allowance for camber but the distance between the groups at the ends of each member shall be altered by the amount of the camber allowance in the member.

(c) ERECTION.

1. The joints of the chords shall be drifted, bolted and preferably riveted to their geometric outline.

2. All other members are to be elastically strained into position preferably by external forces and finally by drifting so that all joint holes are fair when filled with rivets. In drifting and bolting the members into postion, all holes must be filled either

by ..

.....by drifts or bolts.

3. In drifting the joint as many drifts as possible should be driven simultaneously to avoid the distortion of holes and to produce the maximum prestressing.

4. The first procedure during erection consists of placing camber jacks in position on which to support the structure. The camber jacks should be set with their tops level and with sufficient run out to allow for lowering of panel points, except the centre, by the necessary amounts to produce the required camber in the main girders. It is essential that the camber is accurately maintained throughout the process of erection and it should be constatly checked. The jacks shall be spaced so that they will support the ends of the main girders and the pannel points. The bottom chord members shall then be placed on the camber jacks, carefully levelled and checked for straightness and the joints made and riveted up.

5. The vertical and diagonal members, except the end posts shall then be erected in their proper positions on the bottom chords. These verticals and diagonals shall then be riveted to the lower chord

6. The next operation is to connect the top of each vertical and its companion diagonal to their gusset plates by the method indicated above. (It may be necessary in the case of heavy members to rivet the gusset plates to the top chord and later, after lowering the top chord, to connect the web members individually to the gusset plate

7. All panel points, except the centre, shall now be lowere by amounts to produce the correct camber in the main girders as shown on the camber diagram.

8. The top chord shall be erected in its uncambered positio and supported at the panel points by suitable means, the centre being at its final position. It is essential that the centre of this length of top chord should also be the centre of the span. The butt joints

shall ...

shall then be made and rivetted up.

9. The ends of the upper chord shall then be lowered to the cambered position and the web member connections drifted to bring the holes in correct registration.

10. The end posts shall be erected last. ~~Then~~ The upper end connection shall be made first and if there is no splice in the end rake, the final closure shall be made at the bottom end connection. If there is a splice, the final closure should be made at the splice.

Notation.—

f_c = Compressive stress in concrete.

f_s = Tensile stress in steel.

E_s = Modulus of elasticity of steel.

E_c = Modulus of elasticity of concrete.

$n = \frac{E_s}{E_c}$

$y = \frac{\text{cover of comp. steel.}}{\text{effective depth.}}$

d' = depth of centre of compressive steel.

d = depth of beam to centre of steel.

p = Steel ratio for tensile steel.

p' = Steel ratio for compressive steel.

M = Moment of resistance, or bending moment in general.

b = Breadth of beam.

Charts for determining the strength of reinforced concrete beams.

General Description.

In these charts, the values of $\frac{M}{bd^2}$ are given for all reasonable values of p and p'. The left-hand dotted line marked $f_s = 18{,}000$ represents the most economical design for which both concrete and tensile reinforcement are fully stressed. The area to the right of this line represents designs giving lower stresses in tensile reinforcement and other dotted lines representing various tensile reinforcement stresses are plotted on the diagrams. The area to the left represents designs for which the concrete stress is less than the permissible, but as stresses fall off very rapidly, it has not been feasible to draw lines representing lower values of concrete stresses.

Use of Charts for preparing new designs.

The value of $\frac{M}{b}$ having been determined by calculation, the values of d and d′ are assumed and the appropriate chart for ' f_c ' and ' y ' selected. $\frac{M}{bd^2}$ is then calculated and by following across the horizontal line corresponding to this value, values of p can be read off for various values of p′. These give a series of possible designs. The most economical design is given by the intersection of the horizontal line with the inclined dotted line $f_s = 18{,}000$ This generally will not give convenient values of p and p′. In most cases the use of standard diameters of reinforcing rods allows only a limited choice of ratios of p and p′ and a suitable design can be selected by interpolation between the various possible combinations of p and p′ as determined from the diagram.

Use of Charts for checking the strength of existing designs.

The values of p and p′ and y having been calculated from the design, the chart for the appropriate values of f_c and y is selected and the vertical line for the value of p is followed up to the point where it meets the value of p′. The value of $\frac{M}{bd^2}$ can then be read off the diagram by following the horizontal line from the point of intersection to the right-hand edge and the value of f_s (if required) can be determined by interpolation between the inclined dotted lines. Knowing 'd' and 'b', 'M' is determined and can be compared with the actual bending moment which the beam or slab is required to resist. If the actual bending moment is greater than the permissible bending moment determined from the diagram, actual stresses of tensile steel and concrete can be ascertained by multiplying the stresses read off the diagram by the ratio actual/permissible bending moment.

"C O P Y"

SUPERINTENDENT, RESIDENT'S OFFICE.

PROPOSED RULES.

Roadways over railway bridges.

1. The necessity for a roadway for other than railway traffic on a railway bridge, will be decided on its merits, the Provincial Government being afforded an opportunity in each of offering to share in the cost of the combined structur but the final decision in an individual case will rest wi the Central Government.

2. Capital Cost. Shoul the provision of a roadway be decide upon, the division of ost will be on the following basis. must, however, be understood that payment for a roadway will only secure the provision of a road during the life of a stru ture for railway purposes and that if it has to be reconstruc for any reason, th division of cost will have to be made afr

(a). New Bridges

(i) In the ase of Broad Gauge (i.e., 5'-6") bridges, th total cost of e combined structure inclusive of piers, abut ments, protection and training works will be divided in the proportion of 75% to the Railway and 25% to the road.

(ii). M Metre Gauge bridges, the division of cost will be in the roportion of 67% to the railway and 33% to t he ro

(b). Bridges Regirdered. The division of cost when a roadway is pr ded on a bridge which is regirdered will be as follow i.e. the actual cost of the regirdering, including the provi si of the roadway, will be divided as in 2 (a), but no cont ion will be required of the road authority as a share of t o previously incurred on the piers, protection works etc.

(c). Existing roadways on bridges. No division of the cost on the ased basis will be attempted in these cases, until th bridge m to be rebuilt or regirdered, when they will be dealt accordance with the foregoing principles.

GOVT. OF MYSORE.

From

THE GENERAL MANAGER,

MYSORE STATE RAILWAY,

MYSORE.

To

The Secretary
to the Government of His Highness
The Maharaja of Mysore, Railway Department,
Bangalore.

Sir,

Rails required for manufacture of Points and Crossings during 1945.

1) I have the honour to state, that, as required by the Railway Board in their letter No. 554-W/W dated 5-7-44(copy enclosed) an indent was placed on the Director, Civil Engineering, Calcutta, for points and crossings required during 1945 as per list enclosed.

2) The Supply Department, Government of India, have now arranged with Messrs. Richardson and Crudas, Bombay, for supply to us of 25.08 tons of 60 lb. rails and 43.50 tons of 50 lb. rails required for manufacture of the Points and Crossings referred to, and have asked for immediate deposit of the cost of the material in a Government Treasury - Vide copy of the acceptance of Tender No.M.P./124235/C-31/908 dated 28/11/1944 enclosed

3) The value of 68.58 tons of rails ordered by the Supply Department on our behalf comes to Rs.17,556-8-0 (approximate) at Rs. 256/- per ton.f.o.r. Calcutta/ Bombay. I request you to be so good as to obtain and communicate, immediately, orders of Government authorisi our Chief Auditor, to deposit in the Imperial Bank of In Ltd., Rs.17,556-8-0 being the cost of the material as required by the Chief Controller of Purchase (M) Calcutt and also to pay departmental charges (if any) when claim

I am sending a copy of this letter to the Chief Aud

4) The value of 68.58 tons of rails required per list enclosed for manufacture of points and crossings during 1945 comes to Rs 17,556-8-0 (approximate) @ Rs 256/- per ton f.o.r. Calcutta/Bombay, as per tender rate accepted.

5) As regd by the Supply Dept., Govt of India, the G.M. requests to authorise our Ch Auditor to deposit with the Imp Bank of India Ltd Rs 17,556-8-0 towards the cost of materials & also to pay departmental charges, if any, when claimed.

6) In the circumstances explnd, the request of the G.M. is for Consideration & orders. The Chief Auditor may be authorised & depositor to amend with financial concurrence.

7) 68.58 tons of rails are required for the manufacture points & crossings. Supply Dept of the Govt of India have agreed to allot through Messrs Richardson & Cruddas of Bombay, on condition that payment in advance of the cost viz Rs 17,556-8-0 as per tender is made to the Imp. Bank. The payment may be approved.

is seen
at the amount sanctd already does not cover
e manufacturing Costs of materials & that the
xtra Charges amounting to Rs 43,496-14-0 are
ow required to be deposited.

16) In view of the urgency of the matter, the
.n. states that he has accordingly authorised
e Ch. Auditr, M.S. Rly to deposit the amount &
equests approval thereof, which is for
kind orders.

17) It is not known why this aspect of the
uestion was not considered previously by the G.M.
when he requested sanction for Rs 17,556-8-0, only.

18 Further the Chief Controller of Purchase
/3 Calcutta, first asked the G.M. & deposit a
sum of Rs 38174-4-0 to cover the manufacturing
cost & in his subsequent letter, it has been
raised to Rs 43,496-14-0 assigning no reason
for the increase in the cost of manufacture.

21/3 A sum of Rs 17,000 has
already been deposited towards the
cost of rails required for the
replacement of points & cr-
ossings. The controller now
wants Rs 43,496-14-0 to be
deposited to cover the manufacturing
cost, and the G.M. has requested
the Auditor to deposit the sum
The action of the G.M. may
be approved.

of 2% departmental Charges are added

Serial No.

to this, the total cost comes to Rs 63,496 sanctioned already, the cost per set varies from set to Rs 460/- Re the other point viz whether it is possible to manufacture such points crossings here alone, the G. I. states that this may be done at a very little cost of about Rs 1067/- per set & also that the work is undertaken, the more important works connected with engines & wagons will suffer as there is no separate Engineering workshops at present, and adds that the establishment of such a workshop which is included in the Post-War list of works is under consideration in subsidy for period with reference to para 13 Sanjiva

[illegible]

13) Re this Hqrs thinks the cost of manufacturing 112 sets of pts & crossings amounts to Rs 43,496, the cost for each set varies from Rs 321 to Rs 460/- This have been sanctioned already. GM Jhansi states that since cost of which would be manufacturing these sets in our workshops at this would be possible if we had an Engineering workshop, which is very essential in a I class Railway and in absence of same the works of this

Manufacture of points & crossings. 1745

To

The Secretary
to the Government of His Highness
The Maharaja of Mysore, Railway Department, Bangalore.

Sir,

1945 forward programme of Points and Crossings.

Adverting to G.O. No.R.S.1927-29/Ry.F.72 G.44-45 dated 9/2/1945, authorising the Chief Auditor to deposit in the Imperial Bank of India,Ltd., a sum of Rs.17,556-8-0 being the approximate value of rails required for manufacture of Points and Crossings required ~~for manufacture~~ during 1945, I have the honour to state that the Chief Controller of Purchase(M) Calcutta, in his letter dated 2-3-45 to our Controller of Stores, has asked for a further deposit of Rs.43,496-14-0 to cover the manufacturing costs of the Points and Crossings referred to.

As the Chief Controller of Purchase (M) desires expeditious action being taken without any delay,I am requesting the Chief Auditor to deposit the amount now required, viz., Rs.43,496-14-0 which may kindly be approved.

In this connection,I enclose for information of Government copies of the following letters between our Controller of Stores and the Chief Controller of Purchase(M) Calcutta.

(1) Letter No.M.P.131211/C.31 dated 31-1-45 from Chief Controller of Purchase (M) Calcutta to the Controller of Stores.

(2)

Letter No.PS/c 11594 dated 13/2/1945 from the Controller of Stores, Mysore State Ry.Mysore South, to the Chief Controller of Purchase Munitions) Calcutta.

Crossings and switches against this office indent PSC/249 of 16/9/44 DGLP No.131211.Ref. Your No.MP f31211/C-31 of 31-1-1945.

From your above it is not clear whether the deposit required is to cover manufacturing costs only or whether the same includes value of raw materials (Rails) also. A sum of Rs.17,556-8-0 being deposited towards the cost of Railway(required for the manufactures of these points and crossings) as required by the District Controller of Purchase,Calcutta vide A/T No.MP/124235/C-31/908 of 28/11/1944.

In view of this, I shall be glad if you will kindly furnish approximate allocation details for the deposit of Rs.38,174-4-0 now asked for by you. On receipt of your letter, the deposit required will be arranged.

(3)

Express letter No.M.P. 131211/C-31 dated 2-3-45 from the Chief Controller of Purchase (Munitions)Calcutta, to the Controller of Stores,Mysore State Ry. Mysore South.

Sub: Crossings and switches against your Indent PSC.249 of 16/9/1944.Ref.Your letter PSC.11594 of 13/2/45.

Please deposit the sum of Rs.42,644/- plus 2% department charges (i.e. Rs.43,496/14/-) instead of 38,174-4-0 as desired in this offic letter of even number of 31-1-1945.

Please also note that the deposit of Rs.43,496/14/- called for al is to cover the manufacturing costs only of the points and crossings and the amount does not include the value of rails.

Please take expeditious action without any further delay in order to enable me to take necessary action.

The formal A/Tender for the materials cannot be issued unless and until the necessary amount stated above is deposited by you.

This may be treated as most urgent.
